# SIDDESH AJAY GAWANDE

## REACT NATIVE DEVELOPER

Nagpur, Maharashtra · +91 7972393573

siddeshgawande3@gmail.com · LinkedIn · Github · Stackoverflow

---

## PROFILE

Results-driven Software Developer with 2+ years of experience in building high-performance apps using React Native and modern web technologies. Skilled at leveraging AI tools to boost productivity, streamline workflows, and reduce development time. Passionate about creating scalable, user-friendly applications while staying ahead of the curve with emerging technologies. Always seeking efficient solutions to deliver impactful, high-quality features across web and mobile platforms.

## EXPERIENCE

**NOVEMBER-2023 – PRESENT**

### SOFTWARE ENGINEER, MINDBOWSER INFOTECH PVT

- Led and completed two projects ahead of schedule, receiving outstanding client feedback.
- Efficiently managed teams and timelines, ensuring successful project delivery.
- Successfully launched the OppVenuz app, collaborating with the QA team, backend, project managers, and UI teams to ensure seamless delivery.
- Enhanced team knowledge through presentations and shared innovative ideas, promoting a culture of continuous learning.
- Conducted monthly tech meets and tech talks with the React Native team, encouraging group discussions and knowledge sharing.
- Actively participated in the company’s Hackathons (Acceleraton) and other engaging events, fostering creativity and teamwork.
- Consistently applied industry-leading best practices throughout the project development lifecycle.
- Optimized the coding structure of the Mocingbird & Rainyday project for improved performance and implemented new features.
- Worked on the Mocingbird Healthcare project, contributing by implementing a new U.S. state license management feature.
- Contributed to the FHIR Automation Survey project during a company hackathon, integrating new healthcare-related technologies.
- Completed training on FHIR standards, HIPAA regulations, and the U.S. healthcare system, enhancing domain knowledge.
- Created a reusable component library in React Native from scratch for Mindbowser's mobile development team.
- Written multiple blogs on trending technologies and new innovations, and developed Proof of Concepts (POC) for emerging technologies.
- Successfully managed multiple projects, taking responsibility for every aspect of the software development process from planning to delivery.

**JANUARY 2023 – MARCH 2023**

**FRONT-END DEVELOPER (INTERNSHIP), AZEA PVT LTD**

- Designed and implemented Android UI/UX features, focusing on creating responsive and pixel-perfect interfaces.
- Collaborated with backend developers and designers to align on project requirements and deliverables.

## EDUCATION

**OCTOBER 2023**

**POST GRADUATE DIPLOMA IN MOBILE COMPUTING (PG-DMC), Sunbeam Infotech | Pune**

Mobile Computing– CGPA–6.3

**JUNE 2022**

**BACHELOR OF ENGINEERING, Rajiv Gandhi College of Engineering & Research**

Computer Science & Engineering – CGPA–7.6

## SKILLS

- **Languages:** JavaScript, Java, C, C++
- **Frameworks:** React Native, React, Flutter, Node
- **Data Stores:** MySQL, MongoDB, Firebase Database, Firestore
- **Tools / Cloud:** Android Studio, Aws, GitHub, Firebase, Postman, Xcode, Reactron

## PROJECTS

**RainyDay**

- Created the Rainyday project from scratch, using custom components and a React Native boilerplate.
- Collaborated with designers to better understand Figma designs and ensure seamless implementation.
- Worked closely with testers and project managers for timely feature delivery.
- Led weekly sync-up calls with clients and the team to ensure alignment and progress.
- Managed client requirements, delivering features ahead of schedule.
- Provided solutions to clients on complex tasks and design challenges, offering valuable insights.
- Upgraded the project with the latest library versions to reduce latency and optimize for a faster user experience.
- Handled Auth0 for third-party authentication services, including Apple and Facebook login integrations.
- Configured Firebase push notifications for every activity within the app.
- Developed an advanced HomeScreen featuring a dynamic list of posts created by users, which is rendered only when focused. Integrated M3U8 video rendering and optimized image loading using CloudFront for faster response times.
- Integrated Google Maps and Google Places API throughout the app for location-based features.
- Implemented a filter map based on radius in miles, with map pins to locate activities.
- Utilized Amazon SQS for microservices on the backend to ensure efficient data processing.
- Integrated GetStream for messaging features, including group creation, 1:1 chat, sending posts, and sending messages.
- Developed a custom media compressor to reduce latency before uploading media to the app.
- Integrated WebView to display the app's privacy policy and terms of service.

- Integrated the content and user moderation , Admin can take action from admin portal for ban and unban the user.

### Mocingbrid App

- Integrated REST APIs for healthcare features and state license management.
- Upgraded security protocols and ensured compliance with U.S. healthcare standards.
- Worked in collaboration with testers and PMs for feature delivery.
- Hadled Client requrement and delivered it before the time.
- Suggesting client solutions on complex task .
- Refactored the whole project structure to new one
- Migrated the old code to new one , worked on main features like Filter, File cabinate and Pending applications.
- Upgraded the project to latest react native version 76.3 from old version fixed all the Issue occur while updating
- Worked on writing the test cases with jest for mulitple screens

**AppStore** :- https://apps.apple.com/np/iphone/search?term=Oppvenuz

## Certification

- **Learn JavaScript in 1 Hour**
- **React Native Advance Concepts from Udemy**
- **Mindbowser 3 month Bootcamp for React Native & Health care**
- **JavaScript Beginner to Advance course from Udemy**
